

EduTrack CRM - UAT Summary

Full test tracker for the fictional EduTrack CRM Reporting Automation case study. This document validates lead capture, follow-up reminders, Smart Priority Flags, payment-blocked lead tracking, and daily report automation.

Testing Scope

UAT focused on the core CRM workflows used by counsellors, admissions managers, and operations users. The objective was to confirm that leads can be captured, assigned, updated, flagged, reported, and escalated correctly before prototype sign-off.

Test Area	Test Cases	Passed	Failed	Deferred
Lead capture and source tagging	8	8	0	0
Lead quality and awareness fields	5	5	0	0
Status updates and call outcomes	6	5	1	0
Payment readiness and loan fields	6	6	0	0
Follow-up reminders and escalation	5	4	0	1
Daily report and flag summary	6	6	0	0
Total	36	34	1	1

Key Test Cases

TC ID	Requirement / Area	Scenario	Expected Result	Status
TC-01	Lead Capture	Admin logs a new student enquiry with source, campaign, program interest, and contact details.	Lead appears in CRM with correct source and program fields.	Pass
TC-02	Lead Quality	Counsellor marks a lead as Accidental after student says they are not aware of the enquiry.	Lead quality saves correctly and appears in lead source quality report.	Pass
TC-03	Lead Assignment	Admin assigns a new lead to a counsellor with a due date.	Lead appears in counsellor queue with follow-up due date.	Pass
TC-04	Call Outcome	Counsellor logs a call outcome and updates lead stage to Interested.	Lead stage, note, and timestamp are saved in the record history.	Pass
TC-05	High Priority Flag	Lead quality is Genuine, stage is Interested, and payment readiness is High.	System displays High Priority flag in CRM and daily report.	Pass
TC-06	Needs Attention Flag	No follow-up update is logged for 3+ working days.	Lead is flagged Needs Attention and visible to manager.	Pass
TC-07	Payment Blocked Flag	Student is interested but loan status is Partner Issue.	Lead is flagged Payment Blocked and appears in Finance review list.	Pass
TC-08	Low Intent Flag	Lead quality is Not Relevant or awareness status is Not Aware.	Lead is marked Low Intent for lower follow-up priority.	Pass
TC-09	Daily Report	System reaches 6 PM report trigger.	Daily report is generated with lead status, flag summary, payment-blocked count, and source quality.	Pass
TC-10	Access Control	Counsellor attempts to update another counsellor's assigned lead.	System prevents unauthorized update.	Pass
TC-11	Concurrent Edit	Two users update the same lead status at nearly the same time.	One update was not saved correctly during UAT; defect fixed before prototype sign-off.	Fail - Resolved
TC-12	Bulk Reassignment	Manager tries to bulk reassign leads from one counsellor to another.	Feature deferred to future sprint; not required for initial prototype sign-off.	Deferred

Defect and Deferred Item Notes

Item	Description	Resolution
Resolved Defect	Status update did not save correctly during concurrent edits.	Save conflict handling was corrected. Retested and passed before prototype sign-off.
Deferred Item	Bulk reassignment of leads was requested during UAT.	Logged as a future backlog item because it was not needed for the initial portfolio MVP.

Validation Note

Based on the passed test cases and resolved defect, the requirements and prototype for this fictional portfolio case study are considered validated. The deferred bulk reassignment feature remains in the backlog as a future enhancement.

Portfolio Boundary

This UAT summary uses fictional test data and simulated scenarios for portfolio demonstration only. It is not evidence of a real client implementation, production CRM deployment, or real admissions system testing.
